

# Hydrogen bus · measured road-route consumption

New Flyer XHE40 extended-range pilot · April 2025 · measurements only

\* Driving mass reconstructed from measured curb mass plus documented passengers/ballast.  
Source: Schatz Energy Research Center, May 2025. Published battery-SOC corrections retained.  
Hydrogen inferred from tank pressure; approximate precision. Route and HVAC conditions differ.  
No model bars: complete speed/gradient traces are unavailable.
